Many More EMP benefits

Your membership in the Maplesoft Elite Maintenance Program (EMP) now provides you with significantly more benefits. Not only does EMP provide you with upgrades to Maple, but now it also puts many more products and services into your hands.

What's Included

Here's what EMP members get:

- **Access to AI-powered features in Maple**, including:
    - The new AI Assistant, which helps you accomplish your tasks in Maple faster than ever.
    - The new Document Import tool, which turns static PDFs, printouts and other non-Maple documents into Maple documents with live math.
    - The NaturalLanguage package, which powers your own explorations and applications that call on AI from within Maple.
- **Maple Calculator Premium**. Get the power of Maple on your phone, with unrestricted access to features like Solution Steps and Check My Work.
- **Maple Learn**. EMP members have full access to Maple Learn, the online environment for teaching and learning math. You can use Maple Learn directly, as much as you wish. You can also use it to deploy educational content that you create in Maple, such as practice quizzes capable of checking the steps in their solutions, to students who don't have Maple.
- **Maple MCP**. Plug the Maple math engine into your favorite external AI tool, so it will produce math results you can trust.

How Do I Know If I Have EMP?

Probably you do! If you (or your license administrator) purchased Maple less than a year ago, have an active term license, or renewed your maintenance (EMP) within the last 12 months, you have an active EMP membership.

To check your EMP status, go to **My Maple** and click on the EMP Status button ( )

What Do I Need to Do?

When you have EMP, the premium features in Maple will work for you automatically. You don't need to do anything.

The new My Maple ribbon is your starting point for checking your EMP status and for setting up access to the external products, like Maple Calculator. It also provides information about the credit system used by all AI-powered features, including your credit usage.
